## **Dates, details and Call for Abstracts opportunities announced for 2013 ISA Water/Wastewater Symposium**

Research Triangle Park, North Carolina, USA (14 January 2013) – The International Society of Automation (ISA) announces the dates and conference details of its 2013 ISA Water/Wastewater and Automatic Controls Symposium, which will take place 6-8 August 2013 at the Crowne Plaza Orlando-Universal Hotel in Orlando, Florida, USA. Now in its eighth year, the annual symposium offers a unique opportunity for automation, instrumentation and SCADA (supervisory control and data acquisition) professionals in the water and wastewater sectors to share ideas, network and earn continuing education credits.

The 2013 ISA WWAC Symposium is a three-day event that focuses on the challenges associated with providing reliable, secure and cost-efficient automation for the world's municipal water/wastewater infrastructure. The gathering features two full days of technical speakers/presentations, networking events, a poster session, and a supplier showcase. This year's program also includes an optional tour of a local water treatment facility, and two optional short courses on SCADA cybersecurity and flow meter section/sizing. More information is available at [www.isawwsymposium.com](http://www.isawwsymposium.com)

### Invited Speakers

This year's symposium will feature three prominent speakers who will present on pertinent industry topics, including cybersecurity, the benefits of high-performance HMI design, and effective SCADA project management techniques.

John Cusimano, CFSE, CISSP of exida, who also is the instructor for the symposium's two-day in-depth cybersecurity course, will deliver a talk about the current state of cybersecurity at municipal water plants. Bill Hollifield of PAS, who spoke at last year's symposium, will return to provide an overview of a recent EPRI (Electric Power Research Institute) study about the benefits of high-performance HMIs and how these HMI techniques can be applied to water/wastewater SCADA systems. P. Hunter Vegas of Avid Solutions, who recently co-authored the book *101 Tips for a Successful Automation Career*, will present a talk on how to successfully plan and manage SCADA retrofit projects.

### Call for Abstracts

The complete technical program for the symposium will feature over 30 speakers presenting on a variety of automation, instrumentation and SCADA topics unique to the water/wastewater sector. There are still a few speaking slots left in the technical program. The symposium program committee extends an open invitation for potential speakers to submit 250-word abstracts for a 30-minute talk, and a 6-12 page paper

and/or poster. More information, along with the official call for abstracts, can be found at [www.isawwsymposium.com/call-for-abstracts/](http://www.isawwsymposium.com/call-for-abstracts/) Abstracts are due by 31 January 2013.

#### Partnerships with WEF, the Florida AWWA and NRWA

The WWAC Symposium is experiencing a new-found growth in popularity thanks to newly formed alliances with the Water Environment Federation (WEF), the Florida Section of the American Water Works Association (FSAWWA) and the National Rural Water Association (NRWA). By forming strong partnerships with other associations, the symposium has been able to reach a broader cross-section of water and wastewater professionals across the industry. For members of these associations, the symposium provides targeted professional development and training opportunities otherwise inaccessible.

“This collaboration aligns with WEF’s Strategic Direction, connecting water professionals to leverage knowledge and promote innovation,” says WEF Automation and Info Tech Committee Chair Tom DeLaura. “I am very much looking forward to continuing WEF’s technical co-sponsorship of the 2013 WWAC Symposium. It has been a pleasure to be part of the team that brought ISA and WEF together for this symposium, as well as on several other initiatives. The power of such collaboration is uplifting.”

#### Cost-Effective Continuing Education Credits

The 2013 ISA WWAC Symposium offers a cost-effective way for operators and engineers who work in the municipal water and wastewater sectors to gain valuable continuing education credits. Thanks to partnerships with local organizations, and the ISA’s own role as an education provider, attendees are able to receive both PDHs (professional development hours) and CEUs (continuing education units) for the time they spend at the symposium, and during the symposium’s two optional training courses on cybersecurity and flow meter section/sizing. Registration for the 2.5 day symposium costs only \$425, and discounts are available for AWWA, WEF and ISA members. A special discounted hotel rate of \$92/night has been arranged for symposium attendees.

#### Symposium Preview Brochure

Registration for the symposium is now open. Interested parties can find out more about the 2013 ISA WWAC Symposium via the symposium website at [www.isawwsymposium.com](http://www.isawwsymposium.com) or by viewing the four-page full color “conference preview” brochure, which is also available on the website. Both paper-based and online sign-up methods are outlined on the symposium website, as is information about the two optional training courses on cybersecurity and flow meter selection/sizing that are being offered in conjunction with the symposium.

#### **About the 2013 IS Water/Wastewater and Automatic Controls Symposium**

Presented by the ISA Water and Wastewater Industries Division, in collaboration with the Florida AWWA Section and the WEF Automation and Info Tech Committee, the WWAC Symposium helps professionals in the water and wastewater industries understand how instrumentation, SCADA (supervisory control and data acquisition), and automatic control applications are vital to the treatment and distribution of water, the collection and treatment of wastewater, and the management of stormwater. The 2013

ISA WWAC Symposium is being held on 6-8 August 2013 at the Crowne Plaza Orlando-Universal Hotel in Orlando, Florida. More information can be found at [www.isawwsymposium.com](http://www.isawwsymposium.com) or by contacting Graham Nasby, general symposium chair, at [graham.nasby@eramosa.com](mailto:graham.nasby@eramosa.com)

### **About ISA**

Founded in 1945, the International Society of Automation ([www.isa.org](http://www.isa.org)) is a leading, global, nonprofit organization that is setting the standard for automation by helping over 30,000 worldwide members and other professionals solve difficult technical problems, while enhancing their leadership and personal career capabilities. Based in Research Triangle Park, North Carolina, ISA develops standards, certifies industry professionals, provides education and training, publishes books and technical articles, and hosts conferences and exhibitions for automation professionals. ISA is the founding sponsor of the Automation Federation ([www.automationfederation.org](http://www.automationfederation.org)).
