

SCADA STANDARDIZATION

Developing Effective Process Automation Standards for your Facility

Monday, March 12 ■ 4:30-5:30pm ■ ETB 235/236

Graham Nasby, P.Eng., PMP,
Eramosa Engineering Inc.

The need for standardization of its SCADA infrastructure led the City of Guelph, Ontario, Canada (population: 132,000) to develop a set of comprehensive SCADA standards to guide the continuing expansion and upgrading of its water facilities.

This presentation will focus on the steps the City of Guelph Water Services Department took during the last five years to develop a set of comprehensive SCADA standards, the successes/challenges from implementing them, and how the standards were adopted as part of the workflow for all new capital projects. The talk will also discuss the importance of having high-quality specifications and facility standards for automation projects.
